Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Reiser (US 2001/0002299) discloses a fuel cell stack "26" comprising a fuel inlet/exhaust manifold "29" & "31" and a fuel turn manifold "30", wherein the fuel inlet/exhaust manifold has a fuel inlet and a fuel exhaust which are accessible from a first face of the fuel inlet/exhaust manifold (See Figure 4a). Nishiumi et al (US 2002/0187382) discloses a pair of fuel cell stacks "223" and a plumbing arrangement interconnected between a reactant gas supply pipe "235bi" and the inlet/outlet manifold inlets "231b inlet" and an exhaust plumbing extending from the outlets "231b outlet" of the inlet/outlet manifold to an exhaust pipe "235bo" (See Figure 8). However, Reiser as modified by Nishiumi et al does not expressly teach a plumbing interconnecting with one of the inlets on a first face of a first one of the inlet/outlet manifolds and interconnecting with another of the inlets on a second face of a second one of the inlet/outlet manifolds; an exhaust plumbing extending from an outlet on the first face of the first inlet/outlet manifold and from an outlet on the second face of the second inlet/outlet manifold; and a pair of seal plates, one disposed on the second face of the first inlet/outlet manifold and one disposed on the first face of the second inlet/outlet manifold, whereby to close off the inlet/outlet manifolds.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
